

Conference Room Connections and Presentations made easy with FSR Table Top Boxes

When you're planning a room where people meet, being prepared for laptops and their applications is important. Using FSR table- and wall-mounted accessories, Seacom will help you plan for anything.

Any application in any setting

Ideal for conference rooms, courtrooms, classrooms and even lecterns, these versatile boxes make connections for power, phones and data easy. They're available in a variety of sizes, and can fit tables from 3/4 to 2 1/4 inches thick. And we'll set you up with connector plates that match your needs, and they can be reconfigured easily as your needs change.

And be prepared for ALL video options

Ever have multiple presenters with different laptops? The FSR Digital/Analog Auto Switching Cat-x Transmitter and wall plate not only allows multiple video sources (HDMI, VGA), but also automatically scales images to fit the projector screen or TV being used. It's simple, and it quickly eliminates meeting headaches.

Let Seacom show you how intelligent, versatile and simple your meeting room can be, with products that are "Created To Amaze" from FSR.

Applications

- :: Conference Rooms
